

FIELD INSTALLABLE SOLUTION WITH THE BEST OPTICAL PERFORMANCE & PRODUCT RELIABILITY

$RL \geq 65\text{dB (APC)}, \geq 50\text{dB (UPC)}$
 $IL \leq 0.3\text{dB}$
 Field Polishing Completed in Seconds
 Water and Electrical Power are NOT Needed
 Polishing Films are Reusable
 Labor & Material Cost are Drastically Reduced

The end face of the fiber is set to be protruded from the ferrule by around $70\mu\text{m}$ and is polished to around $20\mu\text{m}$.

Connect the plug to the field polishing tool, pull the retractable string until its end, and complete the polishing by releasing the string for it to retract.
